### SCHEDULED SUMMER NATURAL GAS FILING APPROVED FOR MISSOURI GAS ENERGY

Jefferson City (April 10, 2002)---Natural gas customers of Missouri Gas Energy will see lower natural gas rates under a scheduled summer season filing approved by the Missouri Public Service Commission. This decrease, which primarily reflects estimated changes in the cost of natural gas for the upcoming summer season, takes effect April 15, 2002. The summer season includes the months of April through October.

A residential customer currently pays \$0.46303 per Ccf (100 cubic feet of gas). Under this filing, the rate will drop to \$0.44191 per Ccf, a decrease of approximately 2 cents per Ccf. **The effect of the proposed rate on a typical residential heating customer's natural gas bills for the summer season is a decrease of \$6.60 or 3 percent when compared to the rates currently in effect.**

Approximately 60% to 70% of a customer's natural gas bill reflects the cost of natural gas from wholesale suppliers. The wholesale cost of natural gas (the cost your local natural gas company must pay to its supplier for natural gas) is not regulated by the Missouri Public Service Commission. The wellhead cost of natural gas is unregulated and is primarily driven by supply and demand. The Missouri Public Service Commission does have regulatory review authority to ensure that regulated gas companies make prudent decisions in securing natural gas supplies for their customers.

Missouri Gas Energy serves approximately 498,600 natural gas customers in western Missouri.
